

My project for the PCL program is a Hospital and Skilled Nursing Facility (SNF) Collaboration designed around the INTERACT III quality improvement program. The goals of the program are to reduce hospital admissions and readmissions from the SNF and smooth the transitions of care from hospital to SNF and beyond. The INTERACT III program is a quality improvement program that incorporates staff education aimed at early recognition of changes in patient's condition. And standardized documentation designed to improve communication between the two facilities. In addition, it is my goal to develop partnerships with our local SNF so that we can all work together to improve the health and well-being of our aging population.
